

DATA MINING

LEARNING OBJECTIVE OF THIS CASE STUDY

- CART & Model Performance Measures
- Random Forest
- Neural Network

Excelerate CareerPrep:

Career services by Great Learning.

Be interview ready in 6 hours: Complete Career Prep and you will know how to crack an interview with ease. Designed by industry experts, the Career Prep offers:

- Understand various positions and titles available in the data science ecosystem in 6-hours of mandatory content out of total of 14.5 hours content.
- Get 400+ Data Science Interview Questions and Answers Prepare for Data Scientist and Machine Learning Engineer interviews by learning with 400+ Data Science Interview Questions and Answers.
- How to build Resume and learn from experience of successful alumni
- Framework to solve Guesstimates, quant and aptitude problems used in data science interviews
- Revise the important Data Science concepts.

Complete Career Prep today to speed up your path towards a Data Science job. The Career Prep increase your chances of career transitions by 2X the next transition could be yours!

Note: CareerPrep is mandatory step in unlocking the job board.

CASE STUDY - Diabetes

Management of hyperglycemia in hospitalized patients has a significant bearing on outcome, in terms of both morbidity and mortality. However, there are few national assessments of diabetes care during hospitalization which could serve as a baseline for change. This analysis of a large clinical database was undertaken to provide such an assessment and to find future directions which might lead to improvements in patient safety.

Based on the given data, build different models to predict whether the patient is suffering from Diabetes or not? Secondly Compare the model outputs of different models.

Data Science @ Work

Apply **Data Science at your workplace** to gain some instant benefits:

- Get noticed by your management with your outstanding analysis backed by data science.
- Create an impact in your organization by taking up small projects/initiatives to solve critical issues using data science.
- Network with members from the data science vertical of your organization and seek opportunities to contribute in small projects.
- Share your success stories with us and the world to position yourself as a subject matter expert in data science.
